

2018 International Sport Teaching Symposium in Taiwan

The NTNU, National Taiwanese Normal University organized the 16th Edition of the Biennale International Sport Teaching Symposium for Physical Education Teachers in Taipei, Taiwan (The first Edition was held in 1988).

This course has an important role in improving the quality of the Physical Education Teaching in schools of all levels and promoting innovation and development of PE way of teaching.

Dr Viviana Zito, the South Europe EUPEA Regional Representative, was one of the speakers teaching Body Percussion, Finger Tutting and Total Body workout in Pairs during the Congress. She also advertised EUPEA and its projects to Taiwanese PE teachers during her lessons.

The participation to the Symposium was massive reaching a number of 250 students thanks to the great organization of the seminar by the President of the Society (National Society of the Physical Education of the R.O.C) Ching Ping Lin together with Prof. Hsu, the general secretary of the symposium and the help of all the professional PE colleagues from Taiwan like Henry Chen, the International Coordinator.

The seminar offers 5 options of lessons every hour and some special extra course experience like the Tea ceremony, traditional Chinese dishes tasting, wonderful guided city tours and the spectacular Opening and Closing ceremony.

Outstanding and innovative were the lessons of the 21 speakers: 12 from Taiwan and 9 from different countries abroad: United Kingdom, Singapore, Italy, Switzerland, Japan, Macao, Australia and France.

All the participants were all so dedicate in learning and this makes every lesson full of great vibration and good energy. Everything was so perfect planned: from the course schedule to the condition of the sport facilities until the welcoming of the international teachers who were helped in all their needs.

Students volunteering and Taiwanese colleagues made this teaching experience wonderful!

Prof. Viviana Zito PhD
