

Dear EUPEA Members and friends,

The year 2019 has begun and EUPEA is back again working hard for the promotion of physical education in Europe. As you know, there is “No Education without Physical Education” and this is what we consider to be the mission of EUPEA .

Also in 2019, EUPEA is networking together with its members, to defend the place of physical education in Europe and is contributing to the success of European projects in which EUPEA is involved. The *European Observatory for Physical Education* (EuPEO) is going into its second year and projects like *Basic Motor Competences in Europe* (BMC-EU) and *European Physical Activity Label for Schools* (Eu-PALS) will be completed by the end of this year. *Disentangling Inclusion in Primary Physical Education* (DIPPE) is an exciting project which started recently and will help teachers in primary education to tackle the important issue of inclusion in physical education.

That all said, I wish you all the best in 2019! Let’s continue to fight for a strong physical education presence in Europe!

On behalf of EUPEA

Dr. Claude Scheuer

President of EUPEA
